The Loyola Administrative Perinatal Center

LOYOLA UNIVERSITY HEALTH SYSTEM

Skills Workshop: Emergent Care for Obstetric and Neonatal Patients in the ED

August 4, 2026 8am-1130am

Loyola Stritch Medical Center 3rd floor Simulation lab

2160 S. First Ave Maywood, IL 60153

Intended for Emergency Department RNs, Physicians, Residents and Paramedics

3.5 Nursing CEs will be provided

Illinois perinatal morbidity and mortality reviews have identified that the quality of care EDs provide to pregnant patients experiencing health crisis affects perinatal outcomes.

- **You can improve your skill in recognizing and stabilizing OB and Neonatal patients by participating in this workshop!**
- **You will rotate through six separate skills stations with hands on practice.**
- **Obstetric stations will include Emergent Delivery, Hemorrhage and Maternal Hypertension.**
- **Newborn stations will highlight Newborn Ventilation and Compressions, Intubation and Emergency Medications.**
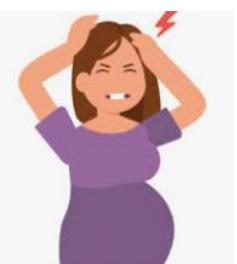

After this education, the learner will:

- ➢ **Understand the importance of identifying women in the perinatal period and utilize standardized evidence-based assessment and management protocols.**
- ➢ **Apply knowledge learned into skills needed to stabilize the pregnant patient.**
- ➢ **Apply knowledge learned into skills needed to stabilize the newborn patient.**

Criteria for successful completion for contact hours:

- Attend the <u>entire</u> presentation
- Active Participant in simulations
- Complete an evaluation
