Med-Peds Monthly Meeting
September 2016

Present: Bhadula, Hughes, Kahn, Kuo, Laubham, Luo, Morrin, Wright

Special guest:
- Brian Medernach shared evolving details regarding the GME Global Health Scholars Program, particularly the curriculum development and local opportunities. PGY-1 and PGY-2 will have the opportunity for an international experience before graduation. PGY-3 and PGY-4 aren’t so lucky. Research/QI time in the +1 week can be used for scholarly activity related to community involvement.

Hyperlipidemia:
- Thanks to Mike and LaBi for leading the discussion. Know the benefit groups. Use the ASCVD pooled cohort equations calculator. Repeat lipid profile in 3-12 weeks after starting a statin.

Influenza:
- Not discussed. ClassMarker.com results suggest that reiteration of preferred testing (RT-PCR), treatment choice (Oseltamivir), and post-exposure prophylaxis treatment length (10 days per manufacturer, 7 days per CDC guidelines) are worth emphasizing.

Recruitment:
- Erinn and LaBi are working to create a system that links social event participation with the tour guide schedule but also incorporates PGY classes. First interview day October 6!

Other business:
- Due to Thursday CPC, MPMM will continue on Wednesdays. In October, we’ll take a break from the ambulatory curriculum to allow a CLER focus visit with Dr. Amy Murray from Anesthesiology. Please make every effort to attend!

Next meeting: WEDNESDAY, OCTOBER 26, at NOON. Location to be determined.
