A Member of Trinity Health

Neonatal emergencies in the delivery room encompass any acute physiological deviation that threatens a newborn's immediate survival, anatomical integrity, and/or long-term neurodevelopment. While "visible" failures (i.e. respiratory and cardiovascular) come to mind as common occurrences, newborn emergencies span a broad spectrum of structural, metabolic, surgical, and environmental crises. Because a newborn's condition can worsen in seconds, delivery teams must prepare for every possible medical crisis to eliminate preventable death/permanent injury.

PROGRAM OUTCOME:

By the end of this educational program, participants will be able to efficiently diagnose and stabilize a neonate experiencing a critical delivery room emergency by performing targeted bedside assessments, prioritizing condition-specific stabilization, and adapting standard resuscitation algorithms based on evidence-based practices and post-intervention evaluations.

TOPICS TO BE DISCUSSED:

- Airway Anomalies
- Spontaneous Pneumothorax
- Congenital Heart Disease
- Abdominal Wall Defects
- Congenital Diaphragmatic Hernia
- Hypovolemic Shock
- Therapeutic Hypothermia

This activity is being offered for a total of 1.5 contact hours for nursing.

Criteria for successful completion and receipt of contact hours for this educational activity include:

- 1) Learner to participate in the entire activity: Attendance documented at start and end of program.
- 2) Learner to complete online evaluation questions and attestation that they have participated in entire presentation.

Evaluation link & QR code will be posted upon conclusion of the program.
CE certificate will be emailed after completion and submission of evaluation.

Access to the evaluation will close on Tuesday, September 1, 2026, at 11:45 pm.

No one with the ability to control content of this activity has a relevant financial relationship(s) to disclose with an ineligible company.

Loyola University Health System is accredited as a provider of nursing continuing professional development by the American Nurses Credentialing Center's Commission on Accreditation
